To whom it may concern,

My name is Dr. Robert. J Snyder, Professor and Director of Clinical Research and Director of the Fellowship Program in Wound Healing and Clinical Research in Barry University SPM.

I am the past president of the Association for the Advancement of Wound Care and the American Board of Wound Management.

I have been using ActiGraft for the past 4 years in clinical practice and clinical studies, and I would highly recommend the use of ActiGraft for wounds with delayed healing and chronic conditions such as pressure ulcers, diabetic foot ulcers and venous leg ulcers.

In my experiences, the ActiGraft promotes healing of these ulcers and accelerates healing time. ActiGraft is simple to use, it's autologous and does not pose any risk to the patient.

If I can be of any additional assistance, please feel free to contact me at drwound@aol.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Robert J. Snyder', with a long horizontal flourish extending to the right.

Dr. Robert J. Snyder

Professor and Director of Clinical Research
